

Thun, a city for children and young people

Children and young people mission statement of the town of Thun

The children and young people mission statement details what is important to children and young people in the town of Thun. It helps us to make Thun a town that is good for children and young people. "We" - all of us. So the children and young people mission statement is for us all: For all children in Thun, for young people and for all adults involved with children and young people. Irrespective of who we are, where we come from and what we bring with us.

We shape and maintain coexistence

We can all live together in Thun peacefully,
without us always having to agree
because there is space for ourselves and for being together
because we recognise and respect our diversity
We promote and maintain this coexistence by
approaching each other openly and meeting each other
asking, listening and sharing
finding out what we can personally contribute
finding solutions that everyone can support

We listen and participate

In Thun, we can all do things that are important to us,
collect and receive information
speak and listen
participate and have a say
What we say and do is
important and is taken seriously
responsible for the fact that things are going well for us in Thun
helpful for generating new ideas

We learn and experience

We can all learn in Thun and gain diverse experiences
where our life happens
because we learn from our mistakes
thanks to our own efforts
with each other and from each other
Our studies and our experiences allow us
to experience joy and develop strengths
to exploit our possibilities
to make a difference
to take responsibility

We inform and network

In Thun, we can all be in contact with each other, whereby we
share information and knowledge
create and maintain relationships
collaborate

The information, the knowledge and the people are
easily accessible
there where we need them
there so that we can support each other in our tasks

We protect and support each other

We can all get protection and support from people and places in Thun
when we have concerns or are not doing well
so that we feel taken seriously and strengthened
so that we feel better physically and mentally
These places and people are there
to protect and support us
so we can work together and be safe
so that we can complement each other in our tasks and challenges
